

Orthodontic Treatment of Class III malocclusions

***Dr. John Bennett in Tbilisi
Saturday 23rd February 2019***

"... the only philosophy which offers a comprehensive system – it includes a range of high quality brackets, precise information on where to place those brackets, and full information on arch form and force levels. All of this is backed up with best-selling textbooks."

Dear Colleagues,

I look forward to the pleasure of working with you on February 23rd. Like all my courses, the day will be clinically based on a range of stage-by-stage treated cases, many of them not seen before. There will be loads of clinical tips as well as advanced concepts, and the material is planned to be of interest to orthodontists at all levels.

McLaughlin Bennett 5.0 retains the best features of our previous treatment method, developed over the last 25 years, including lacebacks, bendbacks, sliding mechanics and group movement. You will see how the technique delivers improved performance on case after case and this success is built on using superior quality brackets, and precise bracket positioning. Our mechanics work best with accurate tie-wing brackets, and this will be the main focus of the course.

If you are already using our mechanics, you should be producing excellent results in a happy working environment, but there is always room for improvement. If we are not making changes, then we are not making progress! I will be covering many key clinical topics, and these will include:

- Understanding and treating Class III (part 1)*
- Understanding and treating Class III (part 1)*
- Class III treatment mechanics*
- Management of Class III relapse*
- Extraction choice in Class III treatment*
- Severe Class III surgery cases*
- Borderline surgery cases*
- Lower second molar extractions*

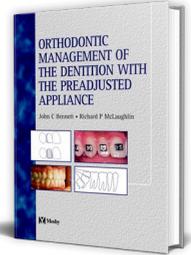

The day will focus on high quality care for today's patients, but will also look ahead five years. Will orthodontic needs be different then? What is likely to be the new focus, and what should we be doing now to meet the challenges ahead? Why not take this chance to spend an enjoyable and clinically relevant day with motivated colleagues? You are warmly invited to join us on February 23rd. to catch up with the latest thinking.

*Sincerely,
John Bennett*

Dr. Bennett is a well-known figure in the world of orthodontics and has a special interest in developing effective mechanics for the treatment of children and adolescents. He is an award-winning author, and has authored or co-authored seven orthodontic textbooks. Working with Dr. Richard McLaughlin and Dr. Hugo Trevisi he developed an overall philosophy of orthodontic treatment which is the method of choice in many university teaching departments around the world. Dr. Bennett completed his specialist orthodontic training at the Eastman Postgraduate Institute in London. He was in full time orthodontic practice in London until 2008, when he was invited to join the orthodontic training program at the European University College in Dubai, as Clinical Director. Dr. Bennett returned to the UK in 2015 to resume clinical duties, and continues to be at the forefront in the development of effective and efficient orthodontic treatment mechanics.

UPGRADING YOUR PRACTICE TO McLAUGHLIN BENNETT 5.0

The landmark text 'Systemized Orthodontic Treatment Mechanics' was first published in 2001. The method was well documented and was widely accepted during the MBT™ era, starting in 2001, but since then Drs. Bennett and McLaughlin have continued to develop and improve their philosophy and treatment mechanics.

In recent years many advances have been made. 'Fundamentals of Orthodontic Treatment Mechanics' was published in March 2014, to document these and to bring everything up to date. It has been released in eight languages, with more in the pipeline, and has been well received internationally. It is the latest in the series of books written to document a treatment method which has been taught to hundreds of orthodontists throughout the United States and around the world, and which has evolved to become 'McLaughlin Bennett 5.0'.

Note: In this comprehensive one day program Dr. Bennett will focus on Class III treatment. He will show recommended treatment mechanics supported by a series of successfully treated cases of medium and severe difficulty.

Forestadent Georgia

1 A, D. Tavkheldze Street, Tbilisi Georgia
Tel : +995 558 18 88 28
e-mail: forestadentgeorgia@gmail.com

The course is planned for a limited group of orthodontists, with ample time for individual questions and discussion. The course will be given in clear English with simultaneous translation into Georgian & Russian. The registration covers all lectures in a high-tech top quality environment, and course handouts. Coffee breaks and a nice buffet lunch are also included.

Participants will receive a course certificate signed by Dr. Bennett. No continuing education points.

Provisional Schedule

Saturday, February 23rd, 2019

08.00 - 09.00 Registration

09.00 - 09.40 Presentation

09.40 - 10.30 Presentation

10.30 - 11.00 Break

11.00 - 11.45 Presentation

11.45 - 12.30 Presentation

12.30 - 14.00 – Lunch –

14.00 - 14.45 Presentation

14.45 - 15.30 Presentation

15.30 - 15.50 Break

15.50 - 16.30 Presentation

16.30 - 17.15 Presentation

17.15 - 17.30 Questions, discussion.

Course Registration

Please fill in your details below and email to Mrs. Tamuna Gegia: tamargegia@gmail.com to express your interest and we will call you back to provisionally hold a place. A place will only be guaranteed upon full payment². Alternatively call +995 591405828 for more details.

Yes, I would like to participate in the course:
