2024 in Germany, Pforzheim

CERTIFICATION WORKSHOPS

4 NEW DATES
AVAILABLE!

**14th March
2024**

**11th July
2024**

**5th September
2024**

**7th November
2024**

 **FORESTADENT®**

Why a certification?

Tera Harz TC-85 is the world's first material for direct 3D printing of aligners. It is already CE and KFDA-certified and also has FDA approval. The processing of Tera Harz TC-85 differs from normal 3D printing in key aspects and must follow the processing protocol specified by Graphy Inc. in order to be able to produce flawless aligners.

Who is this course for?

This workshop is aimed primarily at technicians, but also at practitioners. The necessary technical steps for processing the material are demonstrated and discussed.

Agenda and course content

Agenda

09.15 AM – 09.45 AM	Welcome coffee
09.45 AM – 10.45 AM	Factory tour
10.45 AM – 01.15 PM	Course Part 1

Bernhard Förster GmbH

Preparation

You are welcome to prepare your own aligner files in the workshop and we will then print them.

If you want to try just bring your stl-file and your laptop with the following programs installed:

- Uniz Dental Sliceware**
Free download at https://www.uniz.com/us_en/software after creating an account.
- Lychee Slicer**
Free download at <https://mango3d.io/downloads/>
The free version is sufficient.

We can also provide you with sample files for aligners.
