

“Advances and Updates in the Management of the Dentition”

Dott. Richard P. McLaughlin

Milan (Italy)

16th-17th November 2018

Dr. R. McLaughlin

THE SPEAKER

Dr. Richard P. McLaughlin completed his orthodontic training at the University of Southern California in 1976. Since then he has been in the full time practice of orthodontics in San Diego, California. He lectured extensively in the United States as well as internationally. He is a member of the Pacific Coast Society of Orthodontists, the American Association of Orthodontists, and Diplomate of the American Board of Orthodontics. He is the Component Director of the Southern California Component of the Edward H. Angle Society of Orthodontists and is presently serving as President of the National Angle Society. He is the recipient of the 2009 American Board of Orthodontics Dale Wade Award and the 2010 Pacific Coast Society of Orthodontists Award of Merit. In addition, Dr. McLaughlin is a clinical professor at the University of Southern California, Department of Orthodontics in Los Angeles, and an associate professor at Saint Louis University, Department of Orthodontics. He has written more than 30 journal articles and co-authored 5 textbooks.

COURSE LOCATION

The Four Seasons Hotel Milano nestles unobtrusively between via Montenapoleone and via della Spiga, right in the middle of the Quadrilatero d'oro where the big name boutiques cluster. Here history has left traces of the passage of time in the remains of imperial and medieval walls, in the layout of ancient districts bearing names dreamt up by personages of the past: Borgospesso, on account of formerly being packed with houses and workshops; Sant'Andrea after the parish church, now only a memory of the city's historic past; Santo Spirito and Gesù after the eponymous convents built by members of religious orders attracted by their peaceful surroundings.

Although for centuries, time stood still around the calm expanse of monastic orchards and gardens, something of the atmosphere reflecting its storied past still awaits those wishing to escape from the hustle and bustle of shop windows and city life who, on entering the Four Seasons Hotel Milano, will be enchanted to discover its 15th century cloister, a real oasis of calm, just a stone's throw from the frenetic pace of the city.

The hotel boasts 118 rooms, of which 41 are suites, blending historic architectural details with contemporary Italian design, a perfect fusion of the old and the new, art and technology, elegance and simplicity.

Last but not least, its SPA, a hidden jewel featuring 7 treatment rooms and a stunning swimming pool carved out under its 19th century brick vaults, is well worth discovering. An exclusive haven of tranquillity where everything has been designed to create a serenely private, one-of-a-kind experience.

Four Seasons Hotel Milano, the ultimate experience in luxury!

COURSE ABSTRACT

This course describes the management and correction of specific dental problems involving each individual tooth. Multiple issues related to the incisors, with case examples, are presented. The mechanics of cuspid movement is described, as well as the diagnosis, prevention and treatment of impacted cuspids. The bicuspid extraction verses non-extraction issue is reviewed in detail. First and second molars are discussed relative to anchorage control, distalization, and vertical control. This course closely coincides with the material covered in Dr. Bennett's and Dr. McLaughlin's textbook entitled "Orthodontic Management of the Dentition with the Preadjusted Appliance".

PROGRAM FORMAT

Incisors

Specific concerns of upper central and lateral incisors, as well as lower incisors will be discussed. Emphasis will be placed on incisor trauma, congenital absence, tooth fit and tooth size discrepancy.

Cuspids

The critical tip and torque issues of cuspids will be discussed. Also the management of blocked out cuspids and impacted cuspids will be presented.

First Bicuspids

The extraction of first bicuspid has been a controversial subject throughout the history of the orthodontic specialty. This controversy will be analyzed in detail. Also, the indications for upper first bicuspid extraction only will be discussed.

Second Bicuspids

The rationale, advantages and disadvantages, and the technique of second bicuspid extraction will be presented.

First Molars

The importance of the first molars will be emphasized relative to stabilization, distalization and extraction. The management of badly decayed, broken down and missing first molars will be discussed.

Second Molars

Horizontal and vertical aspects of second molars will be discussed. The controversial subject of second molar extraction will be reviewed. Cases will be presented in an attempt to provide an objective look at this subject.

Retention

The etiology of orthodontic relapse will be discussed, and various techniques of the retention process will be presented.

INFORMATIONS

Fee for the course: € 680,00 + VAT

Lunches and coffee breaks at the Four Seasons are included in the fee.

*The fee includes a case of Mini Sprint McLaughlin Bennett 5.0
that will be delivered at the course registration*

*The course language will be English
with simultaneous translation in Italian*
