The JSOP Practice and Accelerated Treatment
A Forty-Five Year Perspective
On Twenty-First Century Orthodontics

By Dr. Ron Roncone

Date : 30-31 March, 2020
Venue : Point Hotel Barbaros – Istanbul
After receiving his undergraduate degree from Marquette University, Dr. Roncone pursued graduate study in physiology and neuroanatomy at the Medical College of Wisconsin (Marquette School of Medicine) while simultaneously earning his dental degree from the same university. His CV includes postdoctoral certificates from the Harvard School of Dental Medicine and the Forsyth Dental Center, a Teaching Fellow at Harvard School of Dental Medicine, and Assistant Professor of Orthodontics at the University of Maryland School of Dentistry. Dr. Roncone’s practice in San Diego County, California, specializes in adult treatment (esthetics, surgical and TMD) as well as “early” treatment for children.

He is a respected and frequent lecturer, having taught more than a thousand seminars around the globe. His impressive list of technical innovations and the PhysioDynamic philosophy includes reduced treatment time, a minimal number of appointments - between 6-8 for 90% of patients, and long intervals between patient appointments (8-12 weeks), which he introduced in 1989 through the use of titanium wires, and the development of a unique prescription for bands and brackets.

Dr. Roncone is President and CEO of Roncone Orthodontics International. ROI offers practice management courses, a library of 15 manuals and individualized consulting programs which include: scheduling, marketing, patient enrollment, clinical efficiencies, training, and financial management.

Course Summary:
This two day course will take the participants on a voyage of where we were, where we are, and where we are going in the practice of orthodontics. The following is a partial.

- A Complete Systems Approach to Orthodontic Practice
- The 17 Critical Factors
- The Checklist Method of Orthodontics
- A Thirty-Year *Old* *New* Treatment Philosophy
- Why Phase I Treatment is Critical
- The Goals of Great Treatment
- Where is the Problem? Mandible or Maxilla?
- Treating the Transverse First
- The C.R. / C.O. Debate - TMD
  - Condylar Position
  - Occlusion - What Kind?
  - Muscles
  - The Relationship Between Them is Inviolate
- Why 90% of Patients Can Be Treated in 7 or Fewer Appointments
- The Roncone PDS (PhysioDynamicSystem) Philosophy
- Six Steps to Success
- Two Wire Treatment
- Wire Sequencing
- Treatment of:
  - Class I
  - Class II
  - Class III
  - Impacted Canines

Course Schedule
08:30 - 09:00: Welcome and Registration
09:00 - 10:30: Lecture
10:30 - 11:00: Coffee break
11:00 - 12:30: Lecture
12:30 - 13:30: Lunch break
13:30 - 15:00: Lecture
15:00 - 15:30: Coffee break
15:30 - 17:00: Lecture
