## ORTHOeasy<sup>®</sup> Pal

### OrthoEasy Pal – the new palatal pin

The OrthoEasy System is now complemented by the OrthoEasy Pal. Pal stands for palatal, as the new pin was developed specifically for the anchorage of orthodontic appliances in the palate. For example, the Frog appliance can now be attached quicker and easier in the mouth than before. Until now, the lab abutments with the welded appliance had to be attached elaborately with a wire ligature on the pins placed in the palate. The head of the new OrthoEasy Pal is equipped with a practical inner thread so that the abutments can simply be attached with a retaining screw. A lab analog pin and an impression cap help to fabricate the appliance in the orthodontic laboratory.

## Treatment of Class III malocclusion in growing and adult patients

30<sup>th</sup> March, 2019

Hotel Holiday Inn Skopje  
Filip Vtori Makedonski, 5  
Skopje 1000, Macedonia

Speaker:  
Prof. Dr. Nazan Küçükkeles

Macedonia

## Certificate

A certificate of attendance will be provided at the end of the course.

## The Speaker

**Prof. Dr. Nazan Küçükkeles**

She earned her PhD in 1984-89 at the Orthodontic Department of Marmara University in Istanbul, where she subsequently became a professor and, in 2002, the vice dean of the university. She chaired the Orthodontic Department of Marmara University from 2006-2011.

She was editor-in-chief of the Turkish Journal of Orthodontics from 2004-2008. She is the author of a wide range of publications, and for more than 10 years has given presentations at congresses and conducted numerous clinical courses in Europe. Dr. Küçükkeles is an active member of the Angle Society of Europe. For over 15 years her research focus has been especially treatment protocols of true Class III cases.

Her other topics are: orthopaedic treatment of skeletal malocclusions, orthognathic surgery cases, vertical anomalies, maxillary expansion, lingual technique.
